TASK-2

Name: Shaik Chandini

Email id: shaik.chandini5566@gmail.com

Task Title: Landing Page

Task Description: Creating a compelling landing page.I created my college library landing page.The home page of the library contains – Login, Logout, Login details, update details, search details and select your book options.

- First the student should login to enter into the library and Should logout when he/she comes out of the library.
- Logout when the student comes out of the library.
- Login details page displays the student details who utilizes the library on that particular day. The login details page contains the following information –
  - o Student Name
  - o Roll Number
  - o Branch
  - o Year
  - o Book Name
- Search details page help to display details of the students specified with the branch in the search page.
- Select your book option provides to display the books available in the branch specified and enable the student to select the book required.

Steps Taken:

- ➢ I just simply implemented the code in the notepad.
- ➢ For that I selected the new file in the notepad and wrote the code and saved as home.html.
- ➢ I selected the another new file and wrote the code login page and saved as login.html.
- ➢ Followed the same procedure for the remaining codes .
- ➢ Make sure that all the files are in the same directory.
- ➢ Run the home.html page in the chrome/Browser.

Solutions Implemented:

home.html:

```

Learnings:

- ➢ I have learnt how to navigate from one webpage to another webpage.
- ➢ Also learnt how to connect two or more webpage in a website.
- ➢ Got some knowledge how to create tables and how to create fields to enter data and submit buttons.
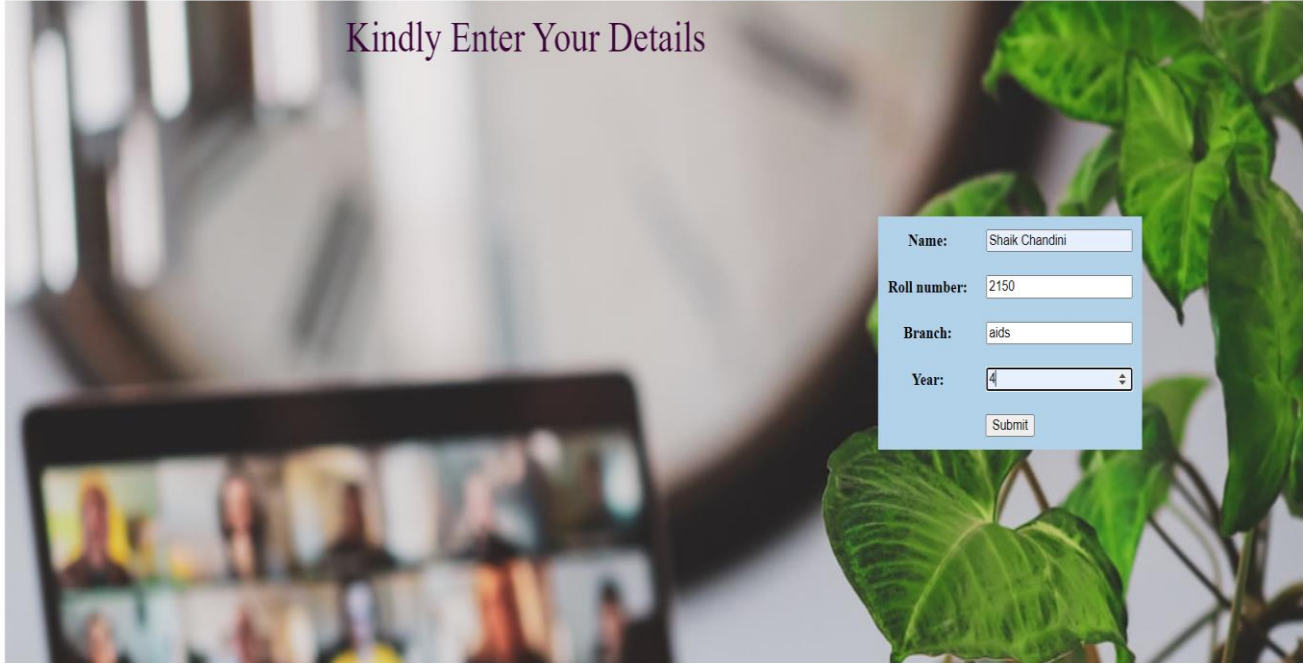

Project Update:

- • Successfully completed the compellind landing page using html.

Output:
